

Greek Solar System Engineering

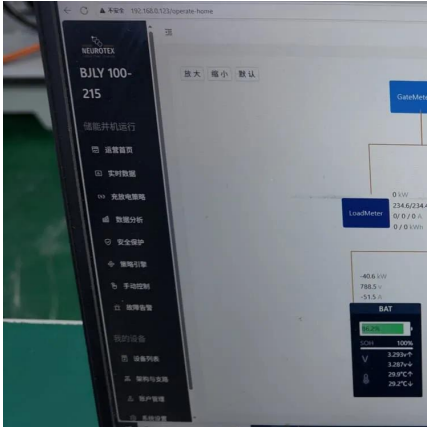

Overview

Their system, they claim, is more authentic than Wright's model, as it uses the known skills of the Greeks and does not add excessive complexity or internal stresses to the machine. Overview The Antikythera mechanism is an hand-powered (model of the). It is the oldest known example of an . It could be used to predict positions and.

Captain Dimitrios Kontos (Δημήτριος Κοντός) and a crew of from island discovered the Antikythera wreck in early 1900, and recovered artefacts during the first expedition with the
