What is the voltage in Greece?

Just like the rest of Europe, the voltage in Greece is 230 volts and the frequency is 50 Hz. Greece has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

Do I need a power adapter in Greece?

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Greece, you will need a power adapter and/or a voltage converter/transformer.

What type of plug is used in Greece?

In Greece, types C and F are the official standards. Like almost all Continental European countries, Greece has standardized on the German plug and socket system. What is the mains voltage in Greece?

Just like the rest of Europe, the voltage in Greece is 230 volts and the frequency is 50 Hz. Greece has standardized on type F sockets and plugs.

What does a travel plug adapter look like in Greece?

When you are going on a trip to Greece, be sure to pack the appropriate travel plug adapter that fits the local sockets. But what do those electrical outlets look like?

In Greece, types C and F are the official standards. Like almost all Continental European countries, Greece has standardized on the German plug and socket system.

What type of electrical outlet does Greece use?

Greece primarily uses Type C and Type F electrical outlets. These types are common in many European countries. Also known as the standard “Euro” plug, Type C outlets have two round pins. Also known as “Schuko,” Type F outlets have two round pins with two earth clips on the side. The standard voltage in Greece is 230V, and the frequency is 50Hz.

Can a Type C plug socket be installed in Greece?

Typically, type C plug sockets are not allowed to be installed in Greece: these outlets are not earthed and are therefore considered dangerous. Only type F power points are permitted because they are grounded and therefore significantly safer. The only (and rare) exception to this rule is that an old type C outlet should be replaced by a new one.
