

## **Has Ukraine switched to photovoltaic site energy**

## Overview

---

PVTIME – Despite the ravages of war, Ukraine achieved significant growth in the PV market in 2024, with new installed capacity reaching 800-850MW in 2024, according to the Association of Solar Energy of Ukraine (ASEU). This growth was driven mainly by the reliance on self-consumption of PV systems by businesses and households to ensure the stability of electricity supply while meeting the challenges of grid security.
