

High temperature lithium battery pack quotation

Overview

What is a high-temperature rechargeable lithium battery?

At CM Batteries, Our high-temperature rechargeable Lithium battery packs are renowned for their exceptional reliability, 1500 cycles from -40°C to $+85^{\circ}\text{C}$, providing lasting power for your innovative devices. The profile of our high-temperature battery cell is 18650 cylindrical, assembled as a high-temperature 18650 battery pack.

What is a high-temperature battery pack?

When your devices work outdoors in winter and summer, our high-temperature battery pack can be discharged and charged for a long time at low temperatures below zero and high temperatures over 60°C . Our high-temperature battery packs are ideal for replacing the current standard 18650 and 21700 battery packs.

What is a high-temperature battery cell?

The profile of our high-temperature battery cell is 18650 cylindrical, assembled as a high-temperature 18650 battery pack. When your devices work outdoors in winter and summer, our high-temperature battery pack can be discharged and charged for a long time at low temperatures below zero and high temperatures over 60°C .

High temperature lithium battery pack quotation

[Lithium battery pack temperature control circuit](#)

The thermal effect must be considered in battery models. In this paper, a simulation model of a lithium battery with thermal characteristics is established. This thermal model is coupled with a ...
