

Home Solar Expansion System

Overview

Should I expand my solar panels?

Some common reasons to expand your solar panels are getting an electric vehicle, installing a battery, electrifying your home, or making home upgrades like an addition or a new pool. You may not know where to begin if you think you need more solar.

How much does it cost to install new solar panels?

Unfortunately, there is no one-size-fits-all answer to what adding new panels will cost, but in general, you can expect it to be around the same average cost to install solar, about \$3.00 per watt. The following table outlines an estimated cost for installing additional solar panels to your existing system: *Assumes 400-watt panels.

What happens if I expand my solar system?

If you installed solar panels under the old net metering policy and expand your system by more than 10% or 1 kilowatt (kW), you'll be moved to the new program, Net Billing, or NEM 3.0, resulting in lower solar savings. How much can you save with local solar incentives?

.

Can I add more solar panels to my home?

Most of the time, you can add more solar panels to your home. The economics will probably look a lot different then the first time you went solar. (And if you live in a state like California that upended its solar incentives, you're probably better off leaving your old setup alone.).

Which states have a new solar billing scheme?

California is the most recent example. In 2023, the state utility commission instituted a new billing scheme (NEM 3.0) that completely changed the

economics of new residential solar setups.
