

Home solar all-in-one light system

Overview

What are all-in-one solar street lights?

All-in-one solar street lights are products of revolutionary advancements in both lighting and battery technologies. The advent of solid state lighting based on LED technology allows the load on the battery system to be drastically reduced. Low power consumption of the light source translates to reduced weight and volume of the battery system.

What is an all-in-one LED street light?

All-In-One LED Solar Street Lights a complete integrated fixture, Including a LiFePO battery, MPPT charge controller, and monocrystalline solar panel.

Are all-in-one solar street lights buried underground?

Before the launch of all-in-one solar street lights, there were primarily two generations or types of street lights: In a split solar street light, all components, including light fixture, solar panel and battery, are separately fixed to the light pole. For some obsolete products, their batteries are buried underground.

What is a solar street light?

All in one solar street lights integrate a monocrystalline solar panel, Phillips 5050 LED chips, and a long life LiFePo4 battery into a compact, reliable, and extremely bright package. This solar all in one street light, and solar parking lot light is an alternative to traditional solar lighting system design.

What are integrated solar street lights?

Integrated solar street lights not only serve traditional applications with more cost-effectiveness and convenience compared with, they can also be functionally and visually integrated into all urban settings such as residential streets, pedestrian precincts and city parks.

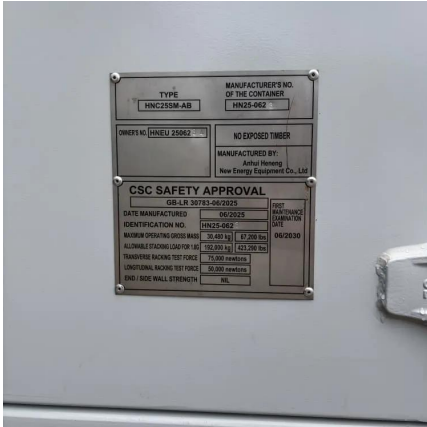

What is AIO solar street light?

Our All in one Solar Street Light, also called AIO solar street light which integrates the green energy parts solar panel, LED lamp and the Lithium Battery Li-NiCoMn 11.1V or LiFePO4 12.8V lithium battery into a single product, with human intelligence induction system to control the lighting mode automatically.
