

Home-use liquid flow battery

Overview

Researchers in Australia have created a new kind of water-based “flow battery” that could transform how households store rooftop solar energy. Credit: Stock Monash scientists designed a fast, safe liquid battery for home solar. The system could outperform expensive lithium-ion options.

Home-use liquid flow battery

What Is A Flow Battery? Overview Of Its Role In Grid-Scale ...

A flow battery is a type of rechargeable battery. It stores energy using electroactive species in liquid electrolytes. These electrolytes are stored in external tanks and pumped ...
