

Household inverter price

Overview

The average U.S. homeowner spends \$2,000 on a solar inverter, but costs range from \$1,000 to \$3,000 depending on the model and the number of inverters. You won't be able to use the electricity generated by your solar panels without a solar inverter. How much does a solar inverter cost?

String inverter systems cost less up front, but systems using microinverters last longer. Solar inverter cost typically makes up 6% to 9% of your total solar system cost. The average cost to install solar panels is \$10,600 to \$26,500 total (after tax credits), including the inverter. What is a solar inverter, and what does it do?

.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

How long does a solar inverter last?

One of the more expensive inverters on the market but still lasted only one year. Find the best solar inverter for your home based on expert and consumer reviews. Inverters maximize solar panel output and convert power from DC to AC, making them an integral part of home solar power systems.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

Which solar inverter should I Choose?

The solar inverter you choose will need to be compatible solar system type you are installing: Grid-tied inverters are meant for grid-tied solar systems, the most common system type. They manage a two-way relationship with the grid, exporting solar power to it, and importing utility power from it as required.

What is a solar inverter?

A solar inverter is an essential part of a solar-panel system. The inverter turns the direct current (DC) electricity generated by solar panels into the alternating current (AC) electricity needed for most appliances and home electrical needs.
