

# **How heavy is the container-type power generation**

## Overview

---

What is the capacity of a container power generator?

Container power generators are available with a rated capacity of 30 kVA to 3000 kVA. Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO container with a length of 10', 20' or 40'.

What is a container type generator set?

The container type generator set is installed in the container. It is designed and manufactured specially for the power supply of field engineering. The power of the genset is generally above 500KW. There are many types of generators. According to the engine speed, they can be divided into high, medium and low speed generators.

What is a container type diesel generator set?

⑤ Container Type Diesel Generator Set The container type generator set is installed in the container. It is designed and manufactured specially for the power supply of field engineering. The power of the genset is generally above 500KW. There are many types of generators.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65, 70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to

accommodate special project requirements are available on request.

What is a generator container?

These containers are designed to protect the generator from external elements, ensuring secure operation in diverse environments. The generator sets within these containers can vary in size and capacity, making them suitable for a wide range of applications.

## How heavy is the container-type power generation
