

How to empty a solar container

Overview

How do you drain a solar pump station?

Locate upper hose connection on right side with a shutoff valve with a blue handle. Connect a hose. Ensure tight connection under pressure. Threads are BSP; insert 3 or more fl at gaskets when using hoses with NPT thread. 4. Locate drain at low point of solar thermal piping. If no low drain was installed use the second valve on solar pump station.

Can you walk on a LONGi Solar PV module?

DO NOT stand or walk on PV modules. Prior to beginning installation, review the Installation Manual for LONGi Solar PV Modules. Do not carry a module alone; always use two people to lift and carry. Do not drill holes in the frame of the module. In addition to invalidating the product warranty, this will also reduce.

How do you repressurize a solar system?

Pump fresh water around Drain all water to remove residue Fill with fresh solar fluid Pressurize the system Bleed air from system and repressurize Only start the work if the collectors are not going to be exposed to high solar irradiation for several hours. If heating up of the collectors cannot be avoided, the collectors must be covered.

How do you clean a solar irradiation system?

Drain all spent solar fluid from the system Fill with fresh water Pump fresh water around Drain all water to remove residue Fill with fresh solar fluid Pressurize the system Bleed air from system and repressurize Only start the work if the collectors are not going to be exposed to high solar irradiation for several hours.

How do I set up a solar pump?

Solar controller: Turn solar pump ON. See controller instruction manual for

details. If the system consists of several tanks, heat exchangers, pump stations, or diverter valves, ensure water is entering all sections. You may have to operate diverter valves to open passage ways. Pump the water around for minimum 15 minutes.

How do you drain solar thermal piping?

It is important to drain as much of the water out as possible, because leftover water will dilute the solar fluid and reduce the frost protection. Locate upper hose connection on right side with a shutoff valve with a blue handle. Connect a hose. Locate drain at low point of solar thermal piping.
