

How to make a communication base station EMS

Overview

How do I select a EMS base station Radio?

To select a channel on an EMS base station radio, you should set the channel selector on the local primary channel as used in your area. The channel select button must be depressed in order to transmit on the selected frequency.

How does an EMS system work?

In some EMS systems, simple standard communications are transmitted by pushing a button on a mobile data terminal (MDT) mounted in the ambulance. Carry portable radio whenever you leave unit. Report must be given to destination hospital so it can prepare for arrival.

How does EMS radio communication work?

It may also convert the signal to a telephone signal and send the communications through public or dedicated telephone lines. EMS radio communication takes place in the VHF low band, VHF high band, and UHF band. VHF low band is the radio frequencies from 32-50 megahertz (MHz).

How does EMS rebroadcast a radio signal?

Some rebroadcast by converting signals to radio and others do so by converting to microwaves. It may also convert the signal to a telephone signal and send the communications through public or dedicated telephone lines. EMS radio communication takes place in the VHF low band, VHF high band, and UHF band.

What CTCSS tone do EMS med radios use?

For this reason, all New Mexico EMSCOM UHF radios on the EMS MED channels should be using CTCSS tone 136.5. Types of Stations: A base station transmits directly to mobiles and portables. If the base station is at some distance away from the operator, it is known as a remote base station.

How do you communicate with an EMS technician?

Give assessment information about your patient, but avoid offering a field diagnosis of the patient's problem. For example, say, "Patient complains of abdominal pain" rather than "Patient probably has appendicitis." Avoid slang or abbreviations that are not authorized. Use EMS frequencies for only authorized EMS communication.
