

# **India 500 000 sets of battery cabinet project**

## Overview

---

Are battery energy storage systems the future of energy in India?

Harsh Shah, Managing Director, IndiGrid, said, "Battery Energy Storage Systems are central to the future of energy in India. They bridge the intermittency of renewables, reduce fossil fuel dependency, and unlock flexible, reliable power delivery."

Is India's largest battery energy storage system powered by solar energy?

In February, the Solar Energy Corporation of India (SECI) commissioned India's largest Battery Energy Storage System (BESS), powered by solar energy.

How big is India's energy storage capacity?

As of March 2024, India achieved a significant milestone, with a total installed energy storage capacity of 219.1 MWh, or roughly 111.7 MW. This reflects the country's commitment to advancing energy storage technology and improving its energy infrastructure.

Does Honeywell Automation India have a microgrid battery energy storage system?

Honeywell Automation India Limited (HAIL) has successfully commissioned a microgrid Battery Energy Storage System (BESS) for the Solar Energy Corporation of India's (SECI) project in the Lakshadweep Islands. The project, which features a 1.7 MWp solar system and 1.4 MWh BESS, is part of SECI's plan to decarbonize the Lakshadweep Islands.

How will VGF support energy storage projects in India?

Each state will receive VGF assistance of INR 27 lakh/MWh to support the deployment of energy storage projects, which are expected to stabilize the grid and support the growing share of renewable energy in their power mix.

Is India's power sector undergoing a structural shift?

India's power sector is undergoing a structural shift as the country advances toward its target of 500 GW of clean energy capacity by 2030. | Photo: Twitter IFC, a member of the World Bank Group, on Thursday committed ₹460 crore to IndiGrid to build India's largest standalone battery energy storage system project in Gujarat.
