Overview

What is the standard packing of crystalline silicon solar modules?

15.2. FLOW CHART OF STANDARD BOX PACKING – 1 & 2 At Citizen Solar the standard packing -1 and standard packing -2 of crystalline silicon solar modules consists of a wooden pallet and a packing box as shown in figures below.

How to pack PV modules?

At receipt of PV modules, verify the product details as it had been ordered. Packing list pasted outside the box contains all details including the serial no of modules. It is recommended to unload the packing box by using forklift only. Always move full bulk pack solution via forklift or jack entering from the short side.

What is the maximum nominal voltage for a PV module?

The maximum nominal voltage for all module series is 1000V or 1500V according to IEC/UL standards. Please check it according to the nameplate. PV module safety class is Class II, where general contact access is anticipated.

How to unload & store PV modules?

UNLOADING, UNPACKING & STORAGE At receipt of PV modules, verify the product details as it had been ordered. Packing list pasted outside the box contains all details including the serial no of modules. It is recommended to unload the packing box by using forklift only.

How to install a photovoltaic module?

Modules are attached through the mounting holes $\phi 7 \times 10$ mm on the back of the module frame. Using corrosion-proof screws (M6) in the installing holes in the module frame, tightening them with 16N-m or suitable force. Try to use the modules with the same configuration in the same photovoltaic system.

What should I know before installing a LONGi Solar PV module?

DO NOT use sharp, unstable structures for support. DO NOT stand or walk on PV modules. Prior to beginning installation, review the Installation Manual for LONGi Solar PV Modules. Do not carry a module alone; always use two people to lift and carry. Do not drill holes in the frame of the module.
