

Iranian photovoltaic module prices

Overview

What is the cost to do 1kw solar panel system in Iran?

The cost to install a 1 kW rooftop solar system in Iran can range from 45,000–85,000 Rials per kilowatt (kW). The cost of a 5 kW system can range from 22,500–42,500 Rials per kW. How much does electricity cost in Iran?

As of July 2024, the average price of electricity in Iran was 0.002 US dollars per kilowatt-hour (kWh), which includes all costs in the electricity bill. Iran's electricity network has undergone significant improvements over the past decade, with notable reductions in frequent and extended voltage fluctuations and power outages.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

Does Iran have a good electricity network?

Iran's electricity network has undergone significant improvements over the past decade, with notable reductions in frequent and extended voltage fluctuations and power outages. However, despite this progress, financial challenges continue to plague the sector, particularly during the summer months when demand surges due to rising temperatures.
