

# **Italian container lithium battery factory energy**

## Overview

---

What is Italy's largest battery cell factory?

Italvolt's 45GWh battery plant will be the Italy's largest, independent, battery cell factory. The battery cell factory will focus on creating new opportunities for re-skilling and upskilling workers from Italy's automotive industry.

Is Italy a good place to start a battery industry?

Today, Italy holds significant opportunity for the modern battery industry, with its strategic location and highly skilled workforce. Italy has a rich industrial heritage, especially as a hub of Europe's automotive industry, offering access to a large, skilled workforce.

What are lithium-ion batteries used for?

Lithium-ion batteries are used to power hybrid and electric vehicles, as well as mass energy storage systems and consumer electronics. Sales of lithium-ion batteries are expected to increase sharply in the coming years while Europe and other regions move toward a low-carbon future.

What are lithium-ion cells used for?

Lithium-ion cells are driving Europe's electric mobility revolution, powering a range of vehicles from passenger cars to public transport. We will also produce next-generation cells to serve a wide variety of industrial applications such as construction equipment and logistics.
