

Italian photovoltaic container house BESS

Overview

Is Bess a viable energy storage system in Italy?

The final considerations emphasize that, despite the need to overcome several obstacles for the installation of an energy storage system, the market for BESS using renewables in Italy is more active than ever.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having an average capacity of less than 20 kWh.

What is a photovoltaic storage system governed by?

Finally, the Circular provides that storage systems with very low capacity served by production plants powered by renewable photovoltaic sources with available power not exceeding 20 kW remain governed, without modification, by article 52, paragraph 2, letter a) of the TUA and by Protocol 38562/RU of 31 January 2020.
