Overview

The Honda Mobile Power Pack (MPP) is an exchangeable lithium-ion battery manufactured by Honda and Panasonic, intended to store power for personal mobility vehicles, including electric motorcycles and scooters. It was introduced at the 2017 Tokyo Auto Show to power the Honda PCX Electric and has since been adopted by the Swappable Battery Motorcycle Consortium formed by ma. HistoryPrior electric scooters previously marketed by Honda, including the CUV-ES (1994) and EV-neo (2009) used a high-voltage traction battery integral to the vehicle; in contrast, the 2018 PCX Electric was based on the conv.

The MPP operates at a voltage of 50.4 V with a minimum capacity of 20.8 A-h (1,052 W-h) as introduced in 2017. It has an overall volume of 7.1 L (0.25 cu ft) and weighs a maximum of 10.9 kg (24 lb), with dimension.

Honda envision that battery swapping stations built around charging banks of MPPs can be used to store energy when production from renewable sources is high and electric demand is low. Initial trials of battery swa.
