

# Join the home solar all-in-one machine

## Overview

---

How does a solar energy system work?

From sunrise, the system captures solar energy and delivers it directly to your home through its grid-tied output. Surplus energy is automatically stored for use during peak hours, at night, or in the event of a short-term outage.

Are DIY solar panels UL certified?

Connect some batteries and solar panels, change the settings, and you are done. The DIY battery community has used these units 24/7 for years! They are extremely dependable. As of 2021, they are now UL certified! This means that the components inside the units are high quality.

What is a solar combiner box?

This combiner box has everything you need, circuit breakers, individual fuses for each string, and a surge protection device. Just hook your panels up to this box, and connect this box's output to your All-in-one solar input. What is a PV Combiner Box?

.

Do I need a combiner box for a solar array?

If you plan to connect a large solar array, you will probably need to put your panels in parallel to keep the voltage down. When you have more than 2 strings of panels in parallel, you need over current protection for each string. This is easily accomplished by using a combiner box. They are available below.

Can I put multiple all-in-one systems in parallel?

If you need more power, you can put multiple all-in-one systems in parallel! Or add as many batteries as you please: you need a combiner box This combiner box has everything you need, circuit breakers, individual fuses for each string,

and a surge protection device.
