

Jordan lithium battery energy storage project

Overview

The Kingdom of Jordan - BESS is a 20,000kW energy storage project located in Jordan. The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project was announced in 2015. Is battery energy storage possible in Jordan?

In response to this, Fichtner in collaboration with the Jordanian Ministry of Energy and the transmission system operator, NEPCO, has analyzed the potential for battery energy storage and, in the role of Transaction Advisor, is providing support for implementing a pilot project.

Will Jordan build a \$40 million battery facility?

Jordan's government has reportedly agreed on proposals for a \$40 million battery facility to push forward the country's energy storage ambitions. The government has signed a memorandum of understanding with 23 international firms and consortia to build a battery storage facility with a capacity of "at least" 30MW, according to The Jordan Times.

Will Al Badiya power generation install a 12mwh lithium-ion battery system?

BBB reported last year that an agreement had been signed to install a 12MWh lithium-ion battery system at Al Badiya Power Generation's solar power plant in Al-Mafraq, Jordan, as part of an expansion of the facility.

Jordan lithium battery energy storage project

Jordan confirms cancellation of solar-integrating energy storage tender

Government representatives from the Kingdom of Jordan in the Middle East have confirmed that tendering for a 30MW / 60MWh energy storage system has been cancelled.
