

# **Kyrgyzstan solar power supply system**

## Overview

---

What is the potential of solar energy in Kyrgyzstan?

On the other hand, Kyrgyzstan presents an enormous solar energy potential due to its high-altitude characteristics. It has been estimated that the potential of solar energy in Kyrgyzstan is 60 % higher than in Frankfurt. Fig. 1 portrays the potential of solar energy in Kyrgyzstan.

Is solar PV a suitable technology for sustainable electricity supply in Kyrgyzstan?

The study shows that the solar PV farm is a suitable technology for sustainable electricity supply in Kyrgyzstan over hydropower plants. The study further identifies the solution to bridge the gap between the technical potential of solar PV and market barriers. 1. Introduction.

Should Kyrgyzstan invest in solar energy?

Legislative pillar: The policymakers should make the FIT more attractive to invite investors to invest in solar-assisted power generation to expand the RE sector in Kyrgyzstan. Consequently, the government should give preference to promoting solar energy instead of focusing on hydro energy.

Is Kyrgyzstan a good country for solar energy?

Despite social, environmental, and ecological and energy issues, the local government focused on building new hydropower plants. On the other hand, Kyrgyzstan is blessed with a great potential for solar energy because of its geographical characteristics which can ensure a sustainable power supply.

Why is Kyrgyzstan's energy sector deteriorating?

in Kyrgyzstan. Deteriorating infrastructure The deterioration of energy sector infrastructure coupled with the financial crisis in the energy system will eventually lead either to a significant decrease in the quality of produ.

## Should Kyrgyzstan invest in R&D?

Given the high solar energy potential of Kyrgyzstan, investing in R&D should represent the first phase to boost renewable energy growth. Besides the gradual reduction of subsidies for renewable energy generation, the decarbonization target of different industries has developed trends for funding clean energy projects.
