

Large-scale shopping mall solar power generation home design

Overview

Black Bear Energy's origins stretch back to Torbin and fellow Black Bear Energy co-founder, executive vice president and chief procurement officer Kim Saylor-Laster's experiences developing their firstenergy.

Are shopping malls the future of energy management?

Shopping malls and similar venues present attractive, big-time opportunities as potential sites for grid-connected solar power, energy storage and intelligent, highly energy-efficient facilities management.

Is solar a good investment for a retail shopping center?

Investing in solar photovoltaic systems can be a wise investment for a retail shopping center owner. In many states and situations, installing solar power in a mall or other retail shopping centers can provide a serious competitive advantage over competitors that do not invest in solar.

What are the benefits of solar power in a mall?

In addition to saving money, creating jobs and creating economic development, the best thing about solar power in a mall is that it produces zero air pollution.

Should you install solar power on your retail shopping center rooftops?

Installing solar power on retail shopping center rooftops could also provide MACRS depreciation and huge tax write-offs. Take advantage of a 30% federal tax credit and any state tax credit that might be available. MACRS depreciation allows shopping mall owners to depreciate a large percentage of the system cost in the first year of operation.
