## Overview

---

Are solar generators a good option for your home?

Solar generators are quiet, lack any harmful fumes and exhaust, and are completely renewable. With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone.

What is the best portable solar generator?

We've tested several models and the Jackery Explorer 2000 Plus is our favorite solar generator, replacing the Jackery Solar Generator 2000 Pro. It can be paired with Jackery Solar Saga 200 panels, our favorite portable solar panels. The combination's light weight means it's easier to move than competitors with similar battery sizes.

Can a solar generator use solar power?

A solar generator can't actually harness solar power unless you have both. What's more, most of these generators are large enough that charging up exclusively with solar power usually isn't feasible: More often than not, you'll need to plug it in to charge, then use solar power to keep it going as long as possible.

What is the best solar generator for home backup?

The Renogy Lycan is one of the largest and most capable solar generators in the market right now. It's designed to be wired to a home power grid. You can even set it up as a UPS, ensuring essential appliances stay powered in a blackout. That, plus its fast charging performance makes the Lycan 5000 one of the best solar generators for home backup.

Can a solar generator power a whole house?

Probably not, unless you get a large solar generator and you have a tiny home. Solar generators are meant to power and charge just a few electronics,

not the entire house. If you want to backup your entire house, go with a wired system complete with solar panels on the roof and a high-capacity battery bank.

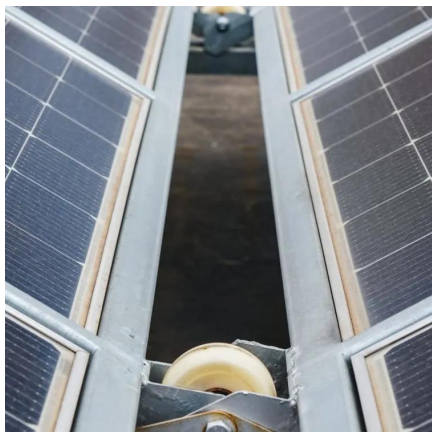

What is the most powerful solar generator?

Heavy and bulky. The EcoFlow Delta Pro is one of the most powerful solar generators in the market. With an output of 3600W, it can power just about any appliance in your home including large ones like the oven, space heater and AC. It can also power multiple appliances at the same time.
