

Latest distribution of Haiti power base stations

Overview

How does electricity work in Haiti?

With very limited access to electricity, most of the population in Haiti depends on charcoal as a source of energy. The National Electricity Company (Electricité d'Haïti – EDH) was created in 1971 to operate the newly built Péligre hydroelectric plant and the nation's power system.

Why are electricity rates so high in Haiti?

Electricity rates in Haiti are higher than the average in the region due to EDH's inability to provide reliable, centrally-supplied power. This lack of reliable power continues to drive demand for alternative power solutions, such as new electrical power systems, generators, inverters, solar panels, and batteries, as well as their maintenance.

What challenges does Haiti face in generating and distributing electricity?

Haiti faces significant challenges in generating and distributing electricity reliably. The lack of access to affordable and reliable power significantly hinders investment and business development. The majority of electricity is produced using imported fossil fuels.

What is the institutional framework of the electricity sector in Haiti?

The institutional framework of the electricity sector in Haiti is weak. The entity in charge of the energy sector is the Ministry of Public Works, Transports and Communications (MTPTC). The minister is also the president of the executive board of the state-owned power company, EdH (Haiti Electricity Company).

How many substations and power plants are 'completely dysfunctional' in Haiti?

The country's power company reported that four substations and one power plant were 'completely dysfunctional' as a result of the attacks.

Did armed groups attack power plants in Haiti?

Electricity of Haiti (EDH) announced that armed groups had attacked four of its substations and the Varreux Power Plant in Port-au-Prince, making them all 'completely dysfunctional'.
