

# **Latvia s regulations on installing green base stations for communications**

## Overview

---

Did Latvia transpose directive 2018/1972?

However, the majority of EU member states, including Latvia, failed to transpose Directive 2018/1972 establishing the European Electronic Communications Code in time. The new ECL was finally accepted in Latvia in its final reading on 2 June 2022.

Are green cellular base stations sustainable?

This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in cellular networks. We review the architecture of the BS and the power consumption model, and then summarize the trends in green cellular network research over the past decade.

What is a green communication initiative?

The green communication initiative primarily aims to improve the energy efficiency, reduce the OPEX, and eliminate the GHG emissions of BSs to guarantee their future evolution [ 2, 3 ]. Cellular network operators attempt to shift toward green practices using two main approaches.

Can Ressa provide power to GSM BSS in Spain?

Martínez-Díaz et al. [ 130] examined the potential of RESs, PV/DG, WT/DG, and PV/WT/DG in providing power to GSM BSs in Spain. They identified PV/DG as the most economically feasible solution with an energy cost of €0.436/kWh.

## Latvia s regulations on installing green base stations for communica

---

### [Installation of communication base stations](#)

Since 2012, GP Systems has installed over 300 new mobile communication base stations for Latvia's major operators (LMT, Bite Latvia, Tele2). Services include site search, legal work, ...
