

Lithium battery energy storage has been halted

Overview

- A California lawmaker is calling for an end to the Morro Bay battery energy project following a fire at a lithium battery storage facility in Moss Landing, operated by Texas-based Vistra Energy. How does uncertainty affect a stationary battery energy storage project?

While existing inventories will allow project development to move forward in the short term, uncertainty extends across the supply chain, including to prospective manufacturers. Tariff chaos reigns supreme in the development of the US stationary battery energy storage industry.

How will tariff chaos affect the stationary battery energy storage industry?

Tariff chaos reigns supreme in the development of the US stationary battery energy storage industry. Facing extraordinary tariffs of 145% on BESS imports into the country, developers will have to rely on inventory to realize projects. When these stockpiles are exhausted the outlook is unclear. Even the 145% tariff rate is uncertain.

Why are lithium-ion battery imports rising?

At the same time, lithium-ion battery imports from South Korea and other sources, like Japan, surged by 225% in the same period. Finn-Foley said the trend is likely to continue as the implementation of the higher “reciprocal” tariffs on these countries has been delayed while Chinese tariffs remain prohibitively high.

Does China have a lithium-ion battery market?

China has 80% of the world’s lithium-ion battery market and a notable lead in EV manufacturing, which is supported by its massive fleet of inexpensive coal-fired power plants.

Does China have a lithium-ion Bess supply chain?

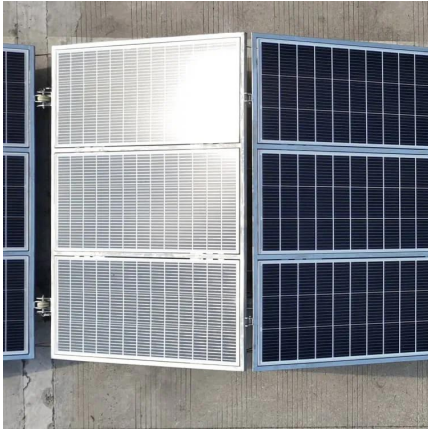

“Any sort of domestic supply chain you have in the US is going to be an

advantage,” said Finn-Foley. However, the lithium-ion BESS supply chain remains heavily dependent on China – from cells through to artificial graphite.

Lithium battery energy storage has been halted

Proposed EV Manufacturing Facilities Are Being Cancelled

In Europe, 11 out of 16 planned battery factories have been delayed or canceled as EV demand has waned and manufacturers are struggling to master the technology. As a ...
