

Lithium titanate battery 60v battery pack

Overview

What is a lithium titanate LTO battery pack?

2.4V~11V Lithium Titanate LTO Battery Packs are designed for emergency lights products and other portable devices. 12V Lithium Titanate LTO Battery Packs are designed for solar street lights and other energy storage. 24V Lithium Titanate LTO Battery Packs are designed for UPS. 36V Lithium Titanate LTO Battery Packs are designed for e-bike and UPS.

What is a lithium titanate battery?

A lithium titanate battery (LTO) is a type of rechargeable battery. It has the advantage of being faster to charge than other lithium-ion batteries, but the disadvantage of having a much lower energy density.

Is lithium titanate battery (LTO) safe?

Our Lithium titanate battery (LTO) packs manufactured according to the requirements of UN38.3, MSDS, CE, CB, RoHS, IEC62133 certifications. And all lithium titanate battery (LTO) undergo the rigorous safe tests (overcharge/over-discharge test, short-circuit test, high temperature test and low-voltage test) in our research laboratory.

How long does a lithium titanate battery last?

Looking for specific info?

lithium titanate batteries: The test data shows that under the conditions of 6C charging , 6C discharge and 100 percent DOD , the lithium titanate LpTO single cell has a cycle life of more than 30000 times , the remaining capacity exceeds 80 percent , and the flatulence generated by the cell is not obvious.

Is Li titanate a good battery?

Li-titanate (LTO) may have low capacity but this chemistry outlives most other batteries in terms of life span and also has the best cold temperature

performance. Moving towards the electric powertrain, safety and cycle life will gain dominance over capacity.
