

# **Lithuania grid-side energy storage cabinet fee standards**

## Overview

---

How will Lithuania support energy storage projects?

Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU. The programme will provide direct grants for the construction of the projects, with a target to support at least 1.2GWh of energy storage projects.

Will EU grant a battery storage project in Lithuania?

European Commission delegation visiting a Fluence battery storage project in Lithuania. Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU.

Are storage facilities exempt from grid tariffs in Italy?

Italy Storage facilities are exempted from the application of grid tariffs, charges covering transmission and distribution, and system costs for the electricity withdrawn and subsequently reinjected into the grid.

What is happening with Lithuania's battery energy storage system?

An international tender for the design, manufacture, installation, and technical maintenance services for Lithuania's battery energy storage system has been announced. Energy Cells signed a contract with the winning consortium of Siemens Energy and Fluence. The start of the energy storage facilities system construction.

How much wood is used in district heating in Lithuania?

The share of woody biomass (mainly wood chips and the renewable share of municipal solid waste) is currently over 85% of the fuel used in district heating in Lithuania. The revised Heat law ensures that municipalities can plan for the sustainable development of their heating sector over a longer period.

Are pumped-hydro storage plants exempt from grid tariffs?

Spain Pumped-hydro storage plants withdrawals from the network are exempt from paying grid tariffs and system charges. Batteries are exempt from grid tariffs when withdrawing energy when they are directly connected to the grid, but not when they are embedded in customers facilities.
