

Lithuanian home energy storage supplier

Overview

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

What is Lithuania's energy strategy?

The Strategy has 4 main objectives – to ensure a secure and reliable supply of energy to all consumers, to achieve 100% climate-neutral energy for Lithuania and the region, to transition to an electricity economy and develop a high value-added energy industry, as well as to ensure the accessibility of energy resources for consumers.

How DH & C systems are being implemented in Lithuania?

Currently part of DH systems in Lithuania is installing and/or planning to install heat storage facilities, which will enable an increase the efficiency and enhance the living age of biomass-burning DH&C systems. These are mainly insulated hot water tanks and/or underground water tank storage.

Will lavastream support geothermal-geological storage in Lithuania?

In the future, Lavastream plans to enable the installation of geothermal-geological storage with a potential of 1 GW. The thermal potential of geothermal power plants in Lithuania is estimated at 20 GW, while the potential of geothermal power plants for electricity generation is over 2 GW.

What are the main sectors of RES development in Lithuania?

According to the National Energy Independence Strategy, there are three main sectors, where the development of RES is planned and accounted for in the National statistics of Lithuania: the electricity sector, the district heating/cooling sector, and the transport sector.

How many independent heat producers are there in Lithuania?

There were 23 unregulated and 20 regulated independent heat producers in the CHP production market. The share of woody biomass (mainly wood chips and the renewable share of municipal solid waste) is currently over 85% of the fuel used in district heating in Lithuania.
