

Low temperature lithium battery pack quotation

Overview

What is a low temperature lithium battery?

A low temperature lithium battery is a special battery developed to address the inherent temperature issues of chemical power supplies.

Can grepow LiPo batteries be used in low temperature environments?

Grepow's LiPo batteries can be made to operate in environments with low-temperatures of -50°C to 50°C . Under low-temperatures, the batteries can achieve a lower internal resistance and, thus, a high discharge rate.

What is low temperature battery?

Low temperature battery adopts special process and special materials. It has good charging and discharging performance under low temperature. It can be used at $-40^{\circ}\text{C}\sim 60^{\circ}\text{C}$ and the discharging capacity of 0.2C at -40°C is over 80% of initial capacity, so it is suitable for subzero temperature.

What is a grepow LiPo battery?

Custom ultra-low temperature batteries, with up to -50°C discharge and -20°C charging, high discharge efficiency, widely used in fields that require low-temperature, such as military , subsea, medical, aerospace, and polar regions. Grepow's LiPo batteries can be made to operate in environments with low-temperatures of -50°C to 50°C .

Low temperature lithium battery pack quotation

Low Temperature Lithium-ion Battery Manufacturer & Supplier

Sunpower New Energy is a professional low temperature battery manufacturer. We support OEM& ODM batteries, just send your requirements to our sales teams. We will get back to you ...
