

Mauritius communication base station wind power infrastructure construction

Overview

Does Mauritius have a modernized telecommunications infrastructure?

The country has a modernized telecommunications infrastructure. This will be further upgraded with the forging of a partnership with French Telecom. The latter took up a 40 percent (R6.6 billion) shareholding in the local Mauritius Telecoms in the year 2000.

What is the infrastructure like in Mauritius?

Infrastructure in Mauritius is well-developed. Roads are maintained in very good condition, with 1,834 kilometers (1,139 miles) out of a total of 1,910 kilometers (1,186 miles) of roads being paved. As of the year 2000, the road system is sufficient to hold the country's traffic volume. Less than one-tenth of the population own cars.

Is there a railway in Mauritius?

There are no railways in Mauritius. Public transport by bus is reliable and efficient, however. The harbor of Port Louis was provided with extra capacity in the late 1990s and has been repositioned to handle high traffic and goods volume. The country operates an efficient freeport, which handles about R9 billion worth of trade per year.

How many airports are there in Mauritius?

There are currently 5 airports, with 2 of them having paved runways. The main airlines flying to and from Mauritius are Air Mauritius (the national carrier), British Airways, Air France, and South African Airways. The country has a modernized telecommunications infrastructure.

Is Mauritius a major transshipment center?

The country operates an efficient freeport, which handles about R9 billion worth of trade per year. In volume terms, this is estimated at around 13,000 tons. Mauritius aims to become a major transshipment center, given its

location between Africa, Asia, and Australia.
