

Moldova Base Station Power Module Factory

Overview

Will a new power plant increase Moldova's electricity generation capacity?

According to Constantin Borosan, State Secretary of the Ministry of Energy, once installed, these plants will increase Moldova's electricity generation capacity by at least 125 MW, and if the 10 smaller plants are received, the total will reach 225 MW.

How long will a 125 MW power plant last in Moldova?

The decision, approved today by the Commission for Exceptional Situations, provides for the free transfer to Moldova of a 125 MW power plant and 10 smaller plants with a combined capacity of 100 MW. The smaller plants could be installed within three to five months.

Where does Moldova's power come from?

The remaining 70 percent of the country's power normally comes from a thermal power station in Moldova's breakaway Transdniester region, where Russian troops are stationed and which also cut deliveries.

Does Moldova need a European Union civil protection mechanism?

The Republic of Moldova has requested the activation of the European Union Civil Protection Mechanism, seeking international assistance for the urgent installation of new electricity generation capacities.
