

# **Nanya Energy Storage Equipment Processing Plant**

## Overview

---

Where is Nanya Technology located?

The company's products are primarily applied in computers, telecommunications, and consumer products. It also distributes semiconductor products and related accessories. Nanya Technology operates in Taiwan, the United States, Europe, Japan, and China. Join us at #electronica2024 in #Munich!.

Where is Nanya Fab located?

Source: Nanya Nanya Technology Corp. has broken ground on its \$10.1 billion semiconductor fab in New Taipei City's Nanlin Technology Park that will be used for DRAM production. The facility will include a main fab with a double-deck cleanroom, R&D center and water recycling center.

What makes Nanya a smart factory?

Nanya's 12-inch wafer fab is equipped with complete infrastructure for smart factory, including automated production lines, IIoT, and big data analytics. We further enhance yield, quality and output with AI applications, including predictive maintenance, production planning optimisation, quality inspection, yield analysis.

Will Nanya Fab create jobs in New Taipei?

Additionally, the fab will create 3,000 high-tech jobs and support thousands of indirect job opportunities in the New Taipei City region. Nanya is currently forecasting to be in production of its first generation 10 nm-class technology process by the end of 2022 and has begun trial production on the second-generation of the process node.

Is Nanya a good DRAM brand?

The third generation and EUV lithography fourth generation are under development. These technology developments will be grafted to the new fab

when operational. Nanya is the fourth ranked DRAM brand by revenue, according to market research from TrendForce. The company had a 3.0% market share behind Samsung, SK Hynix and Micron Technology.

Why should you support Nanya?

By supporting these activities, we aim to encourage experimentation and unorthodox thinking. Nanya's 12-inch wafer fab is equipped with complete infrastructure for smart factory, including automated production lines, IIoT, and big data analytics.
