

# **Nanya Industrial Energy Storage Device**

## Overview

---

What is Nanya Technology?

Nanya Technology is a provider of high quality DRAM devices, JEDEC compliant, for a wide range of consumer and enterprise products. They offer solutions for automotive needs and serve as a one-stop shop covering a wide spectrum of DRAM technologies from DDR1, DDR2, DDR3, and DDR4, with densities ranging from 512Mb through 8Gb.

What makes Nanya a smart factory?

Nanya's 12-inch wafer fab is equipped with complete infrastructure for smart factory, including automated production lines, IIoT, and big data analytics. We further enhance yield, quality and output with AI applications, including predictive maintenance, production planning optimisation, quality inspection, yield analysis.

Why should you support Nanya?

By supporting these activities, we aim to encourage experimentation and unorthodox thinking. Nanya's 12-inch wafer fab is equipped with complete infrastructure for smart factory, including automated production lines, IIoT, and big data analytics.

Is Nanya JEDEC compliant?

Nanya, offers JEDEC compliant, high quality DRAM devices, for a wide range of consumer and enterprise products. Nanya serves as a one-stop shop covering a wide spectrum of DRAM technologies from DDR1, DDR2, DDR3, and DDR4, with densities ranging for 512Mb through 8Gb.

When will Nanya become independent?

Nanya started independent from 2017 with our 1 st generation (1A) of 10nm-class technology. 1A technology could increase output per wafer by 30% and has entered small volume production in 2022. The development of the 2 nd

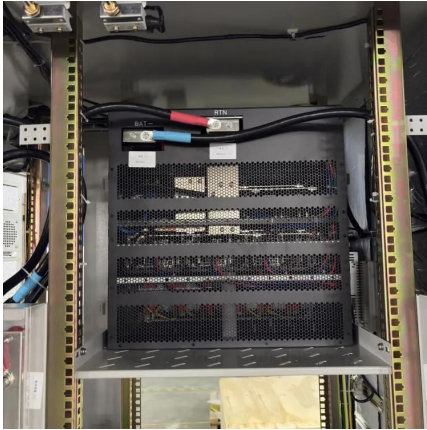

generation (1B) technology began in 2019, which will enter mass production in 2024 to increase output by another 30%.
