

New Zealand glass solar panels

Overview

What is solar control glass?

Metro's solar control glass has a special coating which prevents excess heat from building up inside during summer months, plus retains warmth during winter. Achieve solar control with our smart solar low e double glazing keeping you warm in winter and cool in summer and reducing your power bills.

Which solar control glass is best?

SolarPro™ Plus Low E with a grey colour tone, perfect for creating privacy and reducing glare. See below for more information on our product range. Metro's solar control glass has a special coating which prevents excess heat from building up inside during summer months, plus retains warmth during winter.

Who makes ClearVue glass in New Zealand?

ClearVue has officially entered the New Zealand market through a landmark Manufacturing and Distribution Agreement with Viridian Glass Limited Partnership.

What are solar panels & how do they work?

They are available in either transparent or translucent glass with integrated solar cells to convert clean electric solar energy into electricity. This means that power for a building could be produced within the roof, canopy, sky light or from the glazed vertical façade elements.

Do all solar systems come with monitoring?

All our systems come with monitoring. Learn about them here After installing thousands of solar systems across New Zealand, we have the experience to know quality when we see it. Lightforce offers high-quality solar panels for homes, providing you with greater energy independence.

Are Trina Solar panels available for sale?

All products are subject to stock availability, and the eligibility of your property, and are not for individual sale. Trina Solar's new generation residential solar panel. With improved performance, efficiency, and an industry-leading warranty, this innovative panel will keep you powered for decades to come.
