

# **New Zealand photovoltaic panel refiner**

## Overview

---

Which NZ Oil Refinery has a solar farm?

The Wairau Valley farm in Marlborough, which is working since March 2021, is the country's first to use the multi MW technology. The Marsden Point oil refinery, owned by Refining NZ, has decided to go green by installing a solar farm on 31 hectares of their land.

How many solar panels are installed in New Zealand?

In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption. Globally, solar PV uptake has increased significantly over the past decade.

Is New Zealand ready for grid-scale solar?

In May 2020, the Ministry of Business, Innovation and Employment released a study that considered the economics of grid-scale solar and gave forecasts to 2060, showing that New Zealand has potential for gigawatts of grid-scale solar.

How much does a PV system cost in New Zealand?

In 2009, the average turnkey price for a standard 3-kilowatt (kW) PV system was about NZ\$40,000; by 2024 the average residential system size had increased to 7 kW while the average cost had fallen to NZ\$16,500.

What is New Zealand's New Agri-voltaic system?

We're taking New Zealand's solar production to a new scale, reliably and efficiently feeding electricity into local networks and the national grid. Better yet, our agri-voltaic design allows machinery to operate and livestock to exist happily around the solar arrays, meaning agriculture and grazing can continue.

What is the largest solar power plant in New Zealand?

A project developed under the brand Sunergise, the Kapuni solar power plant is renowned for being the largest working grid-connected plant in New Zealand. Owned by the Todd Corporation, it boasts approximately 5800 photovoltaic panels that can power more than 500 homes at ground level.
