

Niger assembles lithium battery packs

Overview

What is the cell assembly process in lithium batteries?

The cell assembly process in lithium batteries involves arranging and connecting individual cells to form a complete battery pack. This includes cell sorting, mounting, resistance and laser welding, and integrating the Battery Management System (BMS).

What is advanced lithium battery pack design?

Advanced Lithium Battery Pack Design: These custom batteries are made when the customer has special requests for temperature capabilities, dimensions, discharge current, and/or battery cycles. In this case, our chemistries, enclosure, and battery management system (BMS) experts are required to monitor each project closely.

How do you test a lithium battery pack?

Voltage and Current Testing: Use a multimeter to ensure the pack operates within safe parameters. Assembling a lithium battery pack requires careful planning, the right tools, and a thorough understanding of series and parallel configurations.
