

# **Niger energy storage power price**

## Overview

---

How much energy does Niger use?

TPES in Niger was about 91 petajoules (2173 thousand tonnes of oil equivalent) in 2010. The most striking feature of Niger's energy system is the dominance of biomass, which represents 79% of total consumption and meets 83% of household energy needs.

What is the energy sector like in Niger?

The energy sector in Niger is characterised by parallel energy systems, the traditional and the modernised. Both face intrinsic challenges, which cross all sectors and affect the whole population. Current biomass use in Niger has major health implications, especially for women.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

Will Niger reach 750 MW by 2035?

Niger aims to reach an installed capacity of 750 MW by 2030 and an electrification rate of 100% by 2035. In the long run, the country plans to fully open its power sector to private investors. Nigelec dominates the power sector; its concession for the public service of electricity was extended until 2043.
