

# **Nigeria energy storage battery project investment**

## Overview

---

President Bola Tinubu has disclosed that the Nigeria-Grid Battery Energy Storage System will benefit from a planned \$500 million facility from the African Development Bank (AfDB). Tinubu added that the system will provide electricity to 2 million Nigerians. Does Nigeria need a large-scale battery storage system?

However, the use case for large-scale battery storage is glaringly obvious in Nigeria. From food preservation to local clinics, and rural electrification and small businesses, power storage systems should factor significantly in government's policy plans.

Where are batteries made in Nigeria?

Nigeria's battery manufacturing market is ennobled by imports from China and India. Its biggest battery manufacturing plant, Union Autoparts Mfg. Co. Limited, in Nnewi, Anambra State, lies desolate. Batteries used in power back-up systems are mostly imported or assembled in Nigeria.

Is Nigeria staking a claim on the energy sector investment frontier?

Systems that capture energy and store it for later use, either to supply power to an off-grid application or to complement a peak demand, are the emerging energy sector investment frontier, but Nigeria is staking a claim.

What is the growth rate of Nigeria battery market?

Analysts at Data Bridge Market Research say the Nigeria battery market is growing with a compound annual growth rate (CAGR) of 6.3 percent in the forecast period of 2020 to 2027 and is expected to reach \$119.65 million by 2027 mostly through increasing adoption at the household level.

What kind of batteries are used in Nigeria?

Batteries used in Nigeria are mostly for automotive and inverters adopted as an alternative backup to electric power. In recent times, the market has seen

advancements in batteries such as polymers of lithium or a combination of lithium with other chemicals to improve durability.

Why are investment dollars shifting from large-scale utilities to battery-based energy storage?

Investment dollars are shifting from large-scale utilities for battery-based energy storage systems since Tesla provided a proof of concept for the commercialisation of electric cars and advanced battery technology. Nigeria's battery manufacturing market is ennobled by imports from China and India.
