

Nordic factory energy storage power station

Overview

Will Norway's largest pumped storage power plant improve energy supply?

The Norwegian energy company Statkraft has contracted AFRY to conduct a feasibility study on optimising the operation of Norway's largest pumped storage power plant in Saurdal. The study aims to double the plant's capacity to store surplus renewable energy, thereby enhancing consistent energy supply during peak demand periods.

What is the largest energy storage park in the Nordic region?

Romina Pourmokhtari, Sweden's Minister for Climate and Environment, officially inaugurated the largest energy storage park in the Nordic region. The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh.

Is Energi the most forward-looking Renewables Group in the Nordic region?

This acquisition reinforces Å Energi's ambition to be the most forward-looking renewables group in the Nordic region. Å Energi is Norway's biggest renewable energy group, with operations throughout the value chain from electricity generation to end users.

Why do we need batteries in the Nordic energy system?

The storage systems can store electricity when generation is high and prices are low, and then release it again when demand is high, stabilising prices and enabling renewable energy to be used more efficiently. In addition, batteries will play a critical role in ensuring supply security in the Nordic energy system.

Is Finland a good country for energy storage?

"We are very happy that our third energy storage project in Finland is with first class partner Å Energi. Finland is an excellent country for renewable

energy and energy storage, with a stable regulatory framework and a positive and forward thinking grid operator in Fingrid.” stated Hannu Koivusalo, Chairman and Managing Partner of AMP Tank.
