

Nordic power generation container house manufacturer

Overview

The overall package (gas engine, container, and auxiliary components) is designed to meet 65 dB(A) in 10m (surface sound pressure level according to DIN 45635). Lower sound pressure levels are available on request.

A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat.

The standard ventilation is designed for ambient temperatures from -25°C to +34°C. All genset containers are also available with an option for -40°C and most variants can be.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for $+45^{\circ}\text{C}$. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is a containerised modular power plant?

The containerised modular power plant is built to strict high-quality standards and accommodates ambient and heat temperatures, noise attenuation and adhere to site-specific requirements.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/ without CHP in a 40ft container, making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform, you have the flexibility you need to meet a 100% load or even a smaller load.
