

# **North Macedonia 25GWh annual energy storage project**

## Overview

---

How to increase energy storage and system flexibility in Macedonia?

Furthermore, in order to increase the energy storage and system flexibility, among top priorities is the construction of pumped-storage hydro power plant Chebren. The objective is up to 2028 this power plant to be commissioned. The natural gas market in Macedonia is liberalized starting from 2015.

What is the gross available energy in Macedonia?

The gross available energy represents the quantity of energy products necessary to meet all the demand of entities in Macedonia. According to this indicator, among the WB6, Macedonia is ahead of Serbia and Kosovo\*, but is over 2.5 times lower than the average of the EU 28 (Figure 21).

How much energy does North Macedonia need to make 1 EUR?

In fact, North Macedonia needs to spend 0.24 toe (2.8 MWh) of energy to make 1 EUR, unlike EU28 where only 0.1 toe (1.2MWh) is needed. Proposed measures, especially in the area of energy efficiency, will increase the productivity without increasing energy consumption, bringing North Macedonia closer to the EU 28 average. Figure 11.
