

# **Norwegian aluminum acid energy storage battery company**

## Overview

---

Beyonder is an innovative Norwegian Energy Storage-Technology company, focused on high-power batteries for industrial use. Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. “There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It’s the key to turning intermittent wind and solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world’s first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.

Why do we need batteries in Norway?

“Battery production can create new, green jobs and more export opportunities for the Norwegian economy. And that’s exactly what we need right now,” says the CEO of the Confederation of Norwegian Enterprise (NHO), Ole Erik Almlid. Agder Energi and Bjørn Rune Gjelsten’s NOAH AS are two industrial heavyweights that are now launching Morrow Batteries.

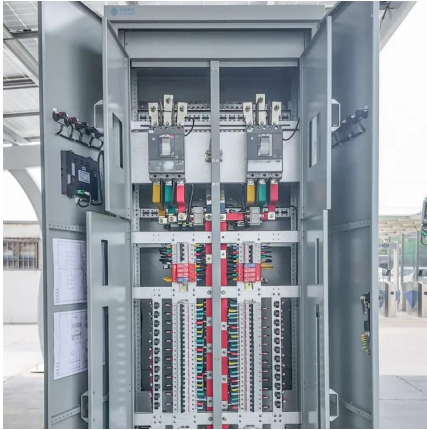

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world’s first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.
