

Pack lithium battery implementation standards

Overview

What are the UL standards for lithium batteries?

UL is an independent product safety certification organization that, in conjunction with other organizations and industry experts, publishes consensus-based safety standards. For lithium batteries, key standards are: UL 1642: This standard is used for testing lithium cells. Battery pack level tests are covered by UL 2054.

What are the IEC standards for lithium batteries?

IEC standards address general, safety, and transportation specifications. For lithium batteries, key standards are: IEC 62133: Secondary cells and batteries containing alkaline or other non-acid electrolytes – safety requirements for portable sealed secondary cells and for batteries made from them, for use in portable applications.

Are lithium batteries UL certified?

Don't compromise on safety. Always verify the UL certification level of your lithium batteries and choose pack-level certified options for the ultimate in performance and peace of mind. Safety is paramount in the world of lithium batteries. One of the most recognized and trusted safety standards is UL certification.

Are lithium batteries regulated?

Shipping batteries is highly regulated, and anyone involved in packaging or handling battery shipments must complete annual certification training. These regulations apply to all lithium battery types and are strictly enforced by agencies such as DOT, IATA, and IMDG.

What are the shipping regulations for lithium batteries?

The U.S. DOT (United States Department of Transportation) defines shipping regulations for the U.S. under 49 CFR, Sections 100 - 185. Section 173.185

specifically addresses specifications and exceptions and packaging for lithium batteries; section 172.101 covers shipping.

What are battery pack certifications?

The battery pack certifications listed here are near universal standard industry practice for leading companies in the electronic industry. Product safety is important to all product stakeholders and passing safety certifications are an independent means of assuring products are safe.
