

Palestine Outdoor Base Station Planning

Overview

What is a spatial vision for Palestine?

The report, “A Spatial Vision for Palestine: A Long-Term Plan That Can Begin Now,” explores how spatial planning, infrastructure, and resource management could improve the daily lives of Palestinians while supporting longer-term political solutions and economic development. The report also includes maps of proposed changes.

Why is spatial planning important in Palestine?

Spatial planning in Palestine gains precedence over all other types of planning due to the political situation. In other words, all priorities in physical and economic planning, and the implementation of larger development projects have to be examined and assessed in terms of their geopolitical implications.

What is the Palestinian National Authority doing to improve physical planning?

The Palestinian National Authority is doing its best to enhance its physical planning process thereby setting the stage for ease of implementation and success, with attention to national strategy, policy and priority.

Is Palestine an urbanized country?

Provided shelter for more than 700 people with a specific focus on vulnerable and disadvantaged women. With a 3.2 per cent urban growth rate in 2015, the State of Palestine is classified among the top 25 percent of urbanizing countries. The State of Palestine is an urbanized society with about 75 percent of its population living in urban areas.
