

# Photovoltaic energy storage battery factory

## Overview

---

What is solar photovoltaic (PV) energy & storage?

Solar photovoltaic (PV) energy and storage technologies are the ultimate, powerful combination for the goal of independent, self-serving power production and consumption throughout days, nights and bad weather.

Which companies are driving innovation in battery technology?

With increasing demand for energy storage, leading manufacturers are driving innovation in battery technology. Companies like BYD, Tesla, and PKENERGY are at the forefront of this growth, producing high-efficiency batteries for both residential and commercial applications.

Which batteries are used in our inverters?

For batteries, we only use Class A LiFePO<sub>4</sub> batteries from China's top five brands, using BYD automotive-grade smart BMS technology. Our inverters' core components are adopted with international brands. Such as, IGBT is from INFINEON, and MOSFET is from TOSHIBA.
