

# **Photovoltaic energy storage project development in Lithuania**

## Overview

---

Lithuania has concluded its latest energy storage procurement round with plans to deploy 1.7 GW/4 GWh, five times its initial 800 MWh target, to strengthen grid flexibility and reliability. From ESS NewsWill EU grant a battery storage project in Lithuania?

European Commission delegation visiting a Fluence battery storage project in Lithuania. Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU.

What is the energy storage grant programme?

The programme will provide direct grants for the construction of the projects, with a target to support at least 1.2GWh of energy storage projects. The grants will cover a maximum of 30% of the projects' capital expenditure costs.

When will energy storage funding be available?

The money will be available to all energy storage technologies that are directly connected to the transmission network, and winning projects will be selected through a competitive bidding process. Aid will be granted no later than 31 December, 2025.
