

# **Photovoltaic module exports to domestic sales**

## Overview

---

Is India a net importer or exporter of photovoltaic (PV) products?

India is making significant progress in transitioning from a net importer to a net exporter of photovoltaic (PV) products. In Fiscal Year (FY) 2024, Indian PV manufacturers exported approximately US\$2 billion worth of PV modules. The export value of PV modules from India increased by more than 23 times in just two years between FY2022 and FY2024.

Does India export photovoltaic modules?

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and FY2024, primarily to the US, which accounted for more than 97% of India's exports in both FY2023 and FY2024.

What data is included in the photovoltaic industry report?

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include volumes in peak kilowatts and average prices.

Can data be published for different types of PV cells & modules?

Data can no longer be published for the specific types of PV cells and modules, or by region. Table changes: Table 1. Not published for 2022. Table 2. Unchanged, includes data from annual and monthly respondents. Table 3. Unchanged, includes data from annual and monthly respondents. Table 4.

## Photovoltaic module exports to domestic sales

---

### India's solar cell and module imports decline by 20% and 57% in ...

Despite progress, India remains dependent on imports for photovoltaic cells and wafers, as domestic wafer production is yet to be established. Indian manufacturers are ...
