

# Photovoltaic panel installation at the beach

## Overview

---

Should I add solar to my beachfront home?

Adding solar is an easy way to keep your electricity costs as low as possible for your beachfront home. Just make sure your solar panels are certified to meet IEC 61701 standards for exposure to salt spray. Are you ready to add solar to your beachfront home?

.

Should you install solar panels on your waterfront home?

A comprehensive warranty, as well as panels that have passed the IEC 61701 certification, will give you peace of mind, knowing that your investment is protected. For homeowners who live near the ocean, installing solar on your waterfront home is an excellent way to reduce energy costs.

Should you install solar panels in the Bay Area?

With its clear weather and about 5 kilowatt-hours of solar irradiance per square meter, the Bay Area offers exceptional solar generating capabilities. Even if you are directly on the coast, where the occasional rainstorm, fog, or cloud may shade the panels, installing solar panels is a good option that can produce a large amount of energy.

Are solar panels a smart investment for waterfront homes?

Waterfront homes, often characterized by their unobstructed views and lack of shade, are in an excellent position to harness the power of the sun. The abundant sunlight can generate a significant amount of solar energy output, which leads to big savings on energy bills and makes solar panels a smart investment for waterfront homeowners.

Are solar panels a good investment for an oceanfront home?

Even with the corrosive environment and the occasional inclement weather,

solar panels are a worthwhile investment for any oceanfront home. It can dramatically reduce your electricity costs while providing you with green, renewable energy.

Do solar panels work in a coastal environment?

Most solar panel brands and models have passed the IEC 61701 Salt Mist Corrosion Test and are certified to work well in a coastal environment. This test simulates the harsh conditions of an oceanfront solar installation, complete with salt spray, moisture, and variable temperatures.
