

# Photovoltaic panel prices in Greece

## Overview

---

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Why are solar panels so expensive in Greece?

Global demand, industrial accidents, environmental disasters, exchange rates and the impact of the coronavirus pandemic could all be contributing to a rapid rise in the cost of solar power panels in Greece since the beginning of July. Industry sources reported price hikes of up to 25%.

How much photovoltaic capacity does Greece have?

As of December 2013, the total installed photovoltaic capacity in Greece reached 2,419.2 MWp of which 987.2 MWp were installed in the period between January–September 2013 despite the financial crisis. Greece ranks 5th worldwide with regard to per capita installed PV capacity.

Will photovoltaic costs resume a decline early next year?

It adds that some analysts believe costs could resume the decline early next year as they expect delays in projects on an international scale. Greece may add 200 MW in photovoltaic capacity in the second half of the year compared to 130 MW from the first six months, the media outlet reported separately.
