

# Photovoltaic panels need batteries

## Overview

---

Absolutely! In fact, most home solar systems are currently operating without battery storage. If you're fine with drawing from the grid and not particularly worried about power outages, you might not need a battery. However, there are benefits to having battery storage for your solar panels. In addition to backup.

If battery storage isn't in the cards for now, don't worry! You can still use your solar panels to power your home without battery storage. In fact, a.

In many cases, battery storage is a "nice to have" with solar panels for home use. However, there are a growing number of scenarios where having a solar battery bank is beneficial, if not completely necessary.

Most homeowners do not need batteries for solar panels. Batteries store extra energy for use during power outages. They can also charge from the grid. Although batteries improve solar systems' efficiency, they are not mandatory.

## Photovoltaic panels need batteries
